MEET.ONE

1. How to create EOS account

1）Download Dapp

Method 1: Download through the link

MEET.ONE wallet download link： https://meet.one/download
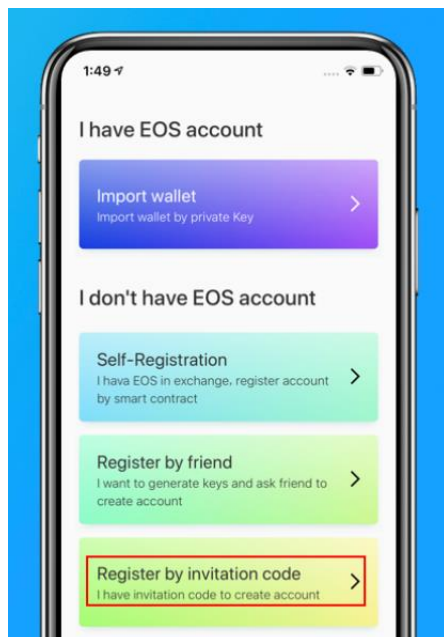

Method 2: Scan QR Code to download wallet

2）Create account with invitation code

A. Open DAPP, select "Register by invitation code"；

B. Set your EOS account, protect your password, copy the invitation code, and
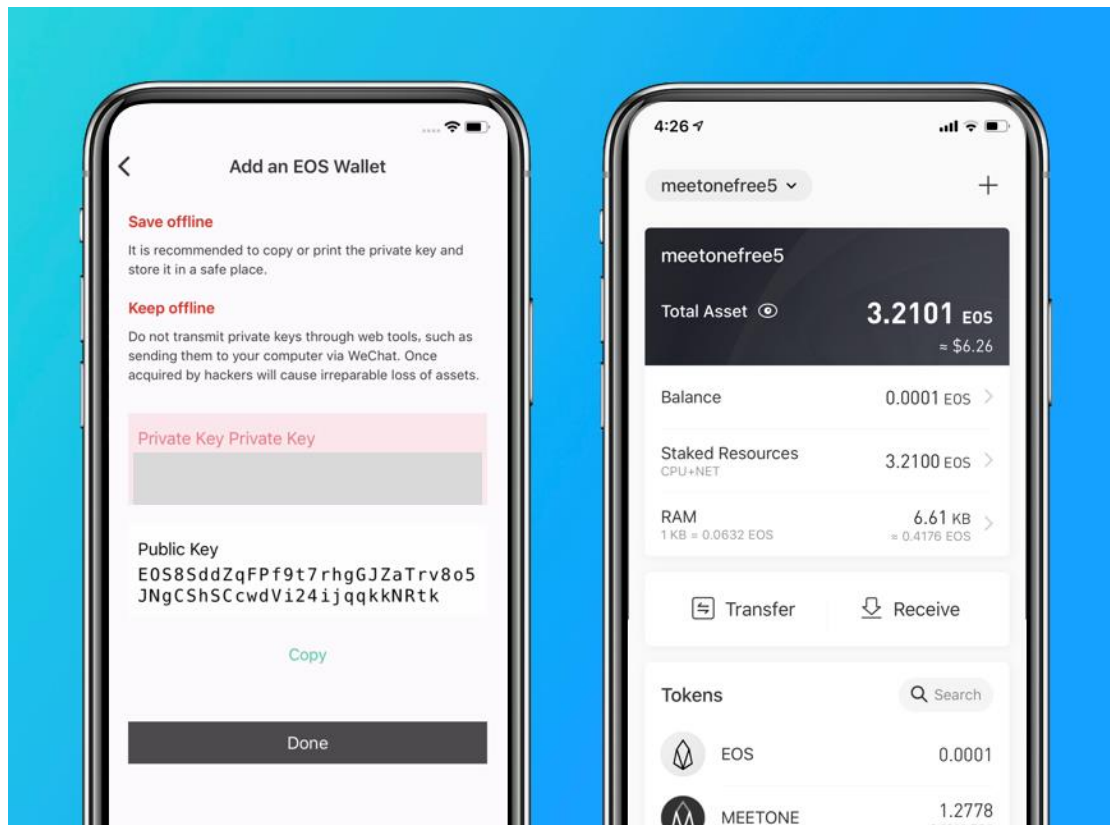

click "OK"；

Registration Notice:

The EOS account is consist of 12 signs and supports only lowercase English letters a-z and numbers 1-5 (numbers 0 and 6-9 cannot be used).

The correct examples: ilovemeetone, meetone12345

After successful registration, it will jump to the Private Key page. Confirm that you won't take screenshot, click "I agree" after transmitting the private key, and make sure your private key is copied and stored safely.

C. After saving the private key, click "Finish" to confirm that the private key has been "saved" and you can enter the EOS account page.

Security Reminder:

Owing the private key is the ownership of the account. If the private key is lost, it cannot be retrieved (except using the arbitration system). Please make sure that the private key information has been accurately copied and kept safely. Do not save your private key by screenshot or sending it via social networks, such as Facebook, Whatsapp, etc.

The EOS private key is a set of numbers of 51 signs, begins with 5 and is case sensitive.
